2023
Organization Profile

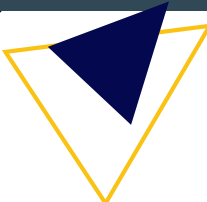

A man in a floral shirt is standing in front of a large projection screen, gesturing with his hands as if presenting. The screen displays a website with various images and text. In the foreground, the back of a person's head is visible, looking towards the presentation. The background is a dark blue diagonal shape with a white triangle pointing upwards.

ABOUT CECT

CECT is a research center in Trisakti University, which also functions as consultant for Sustainability. CECT established MM-Sustainability (Master Degree Program with specialisation in Sustainability) with the grant received from the Ford Foundation in 2008.

As the think-tank of MM-Sustainability, CECT's main roles are among other things: improving the curriculum, case studies writing based on its consultancy works, and publishing the researches about Sustainability done by alumni of MM-Sustainability.

CECT has collaborations with many international institutions in the area of Sustainability and Social Entrepreneurship, such as: University of Queensland-Sustainable Mineral Institute; Interlink-Australia; University of Northampton-UK; US Embassy Indonesia; Texas Austin University; British Council Jakarta; Ford Foundation Jakarta; etc.

VISION & MISSION

VISION

Achieve Excellence and make a Difference

MISSION

1. Conducting exemplary research focusing on cases that incorporates local wisdom.
2. Delivering high quality trainings with international standards.
3. Disseminating research result.
4. Collaborating with relevant stakeholders in three sector to achieve greater impact.
5. Providing trustworthy consultative activities.

DIRECTOR MESSAGE

Dr. Maria Ariesta Utha

Center for entrepreneurship, Change, and Third Sector (CECT) Trisakti University was established in 2001 as a research center under the umbrella organization of Post Graduate School Trisakti University (Pascasarjana Universitas Trisakti) and ratified under Rector's Decree on October 2002. It was established as a result of the first collaborative research between Trisakti University and the University of Technology, Sydney (UTS) for the Asia Pacific Philanthropy Network (APPIN) project funded by the Ford Foundation in January 2001. The APPIN research focused on Indonesia's Third Sector Organizations (TSOs) as well as philanthropic organizations. It also identified organizations under the umbrella of the Third Sector. This collaborative research at Pasca Sarjana-USAKTI was coordinated by Dr. Maria R. Nindita Radyati and supervised by Prof. Dr. Thoby Mutis.

Our main activities are in research and in training provision. Most of our research projects are conducted in partnership with other institutions as we believe in the importance and merits of collaborative and cooperative work. In doing so, we broaden our perspective and widen our network. Our research concerns are in the areas of Third Sector Organizations (TSOs) and Micro-Small-Medium Entrepreneurs (MSMEs). CECT'S team comprises of Lecturers from Trisakti University, each of whom has an average teaching and research experience of at least 10 years.

OUR PORTOFOLIO

As our Social Responsibility, We offer scholarship for individual who have the willingness and commitment to grow with us in developing and educating the nation.

7

CECT SUSTAINABILITY AWARDS

The main intention of the award is to acknowledge Sustainability performance of companies from the holistic perspective. It is different from other awards in that the focus is on the organisational performance of one or several projects. One prominent aspect of CECT Sustainability Awards is the new tool to measure “CSR and Sustainability governance performance” based on ISO 26000.

Hence, the emphasis is quite different from corporate governance performance. Other aspects of sustainability used in the analysis are environment, economy, and social.

www.cectsustainabilityawards.com

INTERN TESTIMONIAL

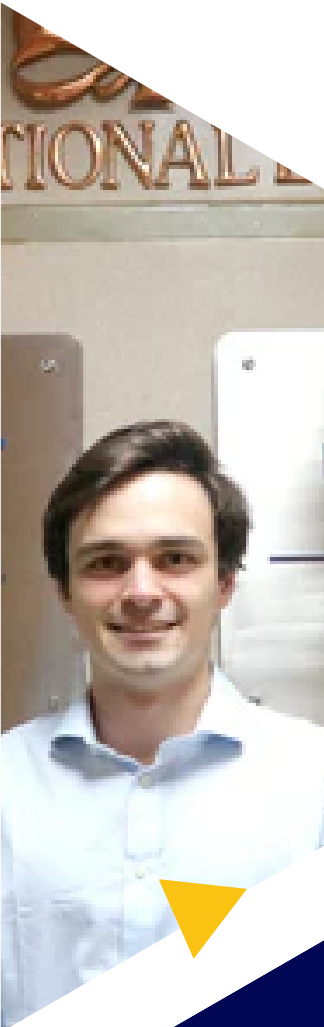

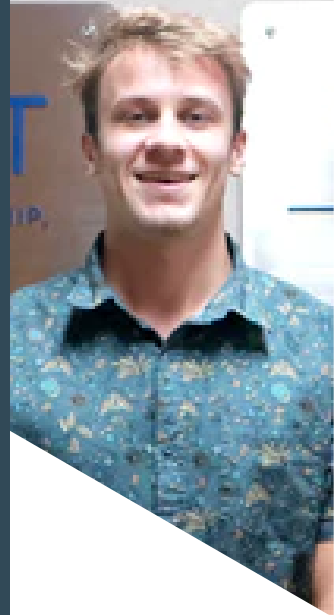

Lleyton Thomas

My four weeks of internship at CECT have been a hugely beneficial experience for me – both on a professional and personal level. The friendly team at CECT reflected a closely knit family and always made sure to make me feel welcomed and comfortable during my time at the office. Building relationships with a variety of different people, and working directly in an Indonesian business have all stirred a desire in me to want to return to Indonesia in the near future.

Angus Nicoll

Interning at CECT has been a great learning experience for me, from an academic, professional and cultural standpoint. I've learnt a lot about inclusive business, CSR and social entrepreneurship and how these contribute to elevated sustainability in an Indonesian context, which is truly unique. We've been able to quiz some of Jakarta's leading sustainability professionals and renowned Indonesian conservationists on some of the most pressing and relevant sustainability issues in Indonesia, as well as make valuable contacts for our own professional networks.
